[Notes]

The Company enacted a 10-for-1 split of its common stock with an effective date of October 1, 2022. Profit per share for the fiscal year ended March 31, 2023 is calculated based on the assumption that the stock split was implemented at the beginning of the previous fiscal year.

Reasons for modifications

The Company modifies its financial forecast for the fiscal year in consideration of the sales trend through the nine months ended December 31, 2023, prospects for the remainder of the fiscal year, as well as a reevaluation of the assumed exchange rate.

The assumed exchange rate has been revised from 150 yen to 155 yen per euro. The assumed exchange rate for U.S. dollar remains unchanged at 140 yen per U.S. dollar.

[Notes]

The Company enacted a 10-for-1 split of its common stock with an effective date of October 1, 2022. The year-end dividend per share for the fiscal year ended March 31, 2023 takes into account the effect of the stock split. However, the interim dividend per share for the fiscal year ended March 31, 2023 does not take into account the effect of the stock split.

Reasons for modifications

If the actual consolidated financial results for the fiscal year ending March 31, 2024 are in line with the modified financial forecasts, the year-end dividend and the annual dividend per share for the fiscal year ending March 31, 2024 are expected to be 109 yen and 189 yen correspondingly based on the Company's dividend policy.

[Notes]

The interim (at the end of 2nd quarter) dividend per share is calculated by dividing 33% of consolidated operating profit of the six-month period by the total number of outstanding shares, excluding treasury shares, as of the end of the six-month period rounded up to the 1 yen digit.

The annual dividend per share is established at the higher of the amount calculated by dividing 33% of consolidated operating profit for the fiscal year by the total number of outstanding shares, excluding treasury shares, as of the end of the fiscal year rounded up to the 1 yen digit, or the amount calculated based on the 50% consolidated payout ratio rounded up to the 1 yen digit.

Forecasts announced by the Company referred to above were prepared based on management's assumptions with information available at this time and therefore involve known and unknown risks and uncertainties such as fluctuation in foreign exchange rates and other changes in the market environment. Please note such risks and uncertainties may cause the actual results (earnings, dividend, and other results) to be materially different from the forecasts.

In addition, the number of outstanding shares used for calculating "Profit per share" is the estimated average number of outstanding shares for each applicable period.
